

COMMUNITY NEEDS ASSESSMENT UPDATE- SEPTEMBER 2021

This 2nd update to the ACCORD Corporation Community Assessment was completed in September 2021 in response to the COVID-19 global pandemic.

EXECUTIVE SUMMARY

As the designated Community Action Agency for Allegany County, (ACCORD) delivers comprehensive services that are financially supported by funding from federal, state, and local sources. These include a diversity of child, youth, and family development, business, community, and economic development and crisis and prevention programs. While programs differ in terms of services and scope, the shared focus is equal opportunity, individual and family self-sufficiency, employment, and community, business, and economic stability. Every three years, ACCORD completes a countywide Community Needs Assessment (CNA) which helps us understand the needs and strengths of our entire community, if and how these needs are changing, and the impact changes have on the most vulnerable among us. The cause and conditions of poverty in our communities are unique in many ways and our ability to drive positive and lasting change begins by understanding where we are right now.

BACKGROUND

This *second* update to our 2019-2021 Community Needs Assessment is in response to a global health pandemic that has not only affected every community in the United States but has also led to the most significant economic disruption since the Great Depression. This assessment is an initial effort to capture some of the emerging needs in the community as well as to forecast how those needs may evolve over the coming weeks and months.

In December 2019, the novel coronavirus disease of 2019 (COVID-19) was discovered to be the causative agent for acute respiratory and flu-like symptoms and began infecting increasing numbers of people in the Wuhan Province of China. The first case in the United States was confirmed by the Centers for Disease Control and Prevention on January 22, 2020. Despite efforts to contain the virus, by March 11, 2020, the World Health Organization declared COVID-19 a global pandemic. By March 17, 2020, all 50 US States had confirmed cases of the virus.

Because of the highly contagious nature of COVID-19, the alarmingly high rate of fatalities associated with it and the lack of a vaccine or treatment, the only effective way to prevent mass illness is through restricted travel, physical distancing, frequent hand washing, coughing in elbows, not touching the face, and staying at home. By mid-March 2020, with the virus clearly past the stage of effective isolation and contact tracing, local, state and federal public health officials recommend extreme measures to minimize a public health catastrophe: mass quarantine, physical distancing, and a virtual lockdown of all public gatherings and economic activity.

While all types of people are getting sick from the disease, older adults and people of any age who experience serious underlying medical conditions, many which are more prevalent in African American communities, and Latinx and Native American communities, are at increased risk for severe symptoms from COVID-19. Persons of color, immigrants, and women are also disproportionately impacted by underlying health conditions linked to poverty, face discrimination in medical care, and are more likely to work jobs that require them to leave their homes. Also, persons with disabilities or chronic conditions are more vulnerable to COVID-19 due to their inability to thoroughly isolate themselves (need for hands-on care), physical impairments, environmental barriers, or interrupted services. The following additional populations experience differential exposure and extensive corresponding implications as a result of the pandemic: frontline workers, persons experiencing

homelessness, gig-economy workers, low-income communities under quarantine, especially in urban settings, rural communities, tribal communities, incarcerated persons and returning citizens.

Children, families, individuals, and Community Action Agency staff may experience heightened stress, anxiety, and trauma as a result of the COVID-19 crisis. Loss of income, growing childcare needs, heightened food insecurity, housing and energy instability, lack of access to transportation, lack of basic supplies, and increased domestic violence are growing factors as the crisis unfolds.

Because of the urgent and widespread needs affecting all sectors of the community, this Community Assessment update is intended to provide some initial information to describe the scope of this crisis on our community and to support the many different responses that will be required to address emerging, evolving needs. It is likely that as needs evolve, some of those needs will not be captured in this update and therefore some necessary community responses may not connect to the needs identified in this document.

2021 UPDATE-BACKGROUND

One of the most important lessons we learned about community needs during a pandemic is that things will constantly change. We adapted and approach planning differently to respond as quickly and effectively as possible. We assess needs daily and through established methods including community surveys, tracking why people are seeking our services, asking those we serve, how is everything else going? What else do you need? We rely on our partners, local and across the state and country to spot trends and prepare as best we can. The significant support to families through the CARES Act and The American Rescue Plan, from stimulus checks, to enhanced unemployment to rent moratoriums significantly impacted our community. Those experiencing sudden and dramatic economic loss due to COVID-19 and many who were already living in or near poverty benefited from these supports. Although the enhanced unemployment ended in September of 2021, other supports continue. One such support was our ability to serve more people with funding through our Community Services Block Grant. This expanded under the CARES Act, allowing us to serve those with incomes up to 200% of the federal poverty level as opposed to 125%. If no federal legislative action is taken, eligibility will again be limited to those at 125% of the federal poverty level.

This update will guide the months ahead and help us make the best use of what we have learned since March of 2020.

The *community* assessed in this document, related to the information below, is defined as the following: Allegany County, NY. The needs assessed will inform services to those affected by the crisis. It is significant to note that Congressional action will permit FY20 and special supplemental CSBG funding to serve families at or below 200% of the federal poverty level (as defined by [the US Census Bureau](#)). Specific programs or strategies will target the demographic groups most affected. Given persons of color are being disproportionately affected by both the health crisis and by the resulting economic disruption, an equity lens must be used to view current and emergent needs related to this crisis.

LOCAL PUBLIC HEALTH RESPONSE

In the United States, the COVID-19 virus has infected approximately 4.8 million people, and there have been over 158,000 deaths. According to the New York State Department of Health COVID-19 tracker, there have been 417,589 confirmed COVID-19 cases, and there have been 25,175 deaths statewide.

As of Tuesday, August 31, 2020, Allegany County's statistics are as follows:

- Confirmed Cases: 61
- Recovered Cases: 104
- COVID-19 Related Deaths: 1
- Total Quarantined/Isolated to Date: 1,634
- Released from Quarantine/Isolation: 1,365
- Currently Quarantined/Isolated: 269
- Precautionary Travel Quarantines to Date: 937
- Total COVID-19 Antibody Tests Given: 6765

- Total COVID-19 Antibody Positives: 35

2021 UPDATE-ALLEGANY COUNTY STATISTICS

In the United States, the COVID-19 virus has infected approximately 38 million people, and there have been over 636,000 deaths. According to the New York State Department of Health COVID-19 tracker, there have been 2,256,899 confirmed COVID-19 cases, and there have been 43,551 deaths statewide.

As of Tuesday, August 31, 2021, Allegany County's statistics are as follows:

- *Confirmed Cases: 3,763*
- *Recovered Cases: 3,646*
- *COVID-19 Related Deaths by residence: 89*
- *Total Quarantined/Isolated to Date: 13,509*
- *Currently Quarantined/Isolated: 131*
- *Total COVID-19 Antibody Tests Given: 169,306*
- *Total 1st Dose Vaccines: 6,516*
- *Total 2nd Dose Vaccines: 6,055*

Date of first COVID-19 diagnosis in Community Assessment Area (Allegany County)

- Allegany County recorded its **first** COVID-19 diagnosis on **March 15, 2020**, when two separate individuals from Allegany County tested positive for COVID-19. (Allegany County Health Dept.)

First date state/local officials issued policies limiting activity (state/county websites)

- Allegany County declared a **State of Emergency** on Saturday, **March 14, 2020**.

A list (from media accounts or official government websites) of the policies/limitations that are currently in place (effective date and expected end date, if known)

- Emergency declarations included or were quickly followed by directions for quarantining, instructions not to visit the emergency room if symptomatic. Schools closed soon after the state of emergency declaration and businesses followed orders and directives issued by their respective health departments and the State of New York, with mandatory closures for businesses considered non-essential. As Allegany County's Community Action Agency, ACCORD remained open to provide crisis services related to basic needs such as food and housing.
- As of September 10, 2020, the state of emergency remains in effect for Allegany County. The local State of Emergency is declared as a continuation of our March 14, April 13, May 13, June 12, July 12, and August 11, 2020, declarations due to the ongoing public health impacts of the Coronavirus-19 (COVID-19). Allegany County is in Phase 4 of re-opening as of August 4, 2020. The Office of the Governor has set requires regions to revert to a more restrictive phase should community spread rise above pre-determined levels.
- Currently face masks must be worn in public and when social distancing cannot be maintained.
- Allegany County lies along the NY/PA border. Restrictions on traveler coming in to NYS issued by Governor Cuomo to reduce exposure from other states experiencing high community spread negatively impacts employers when mandatory quarantines are imposed, limiting employee's ability to perform on-site work. This also is impacting employees who share households with people who work in areas with significant community spread.

2021 UPDATE- CURRENT POLICIES/LIMITATIONS THAT ARE CURRENTLY IN PLACE

- *Governor Cuomo announced on June 15, 2021, that COVID-19 restrictions were lifted immediately as 70 percent of New Yorker's aged 8 or older had received the first dose of their COVID-19 vaccination series. The State's health guidance and New York Forward industry specific guidelines—including social gathering limits, capacity restrictions, social distancing, cleaning and disinfection, health screening, and contact information for tracing—are now optional for retail, food services, offices, gyms and fitness centers, amusement and family entertainment, hair salons, barber shops and personal care services, among other commercial settings.*
- *July 14th, 2021, the ACDOH released information on variants of COVID-19. The most contagious right now is the Delta variant. The WHO estimates the Delta variant is 55 percent more transmissible than the Alpha variant, which was itself around 50 percent more transmissible than the original virus that causes COVID-19. The Allegany County Department of Health has not identified any cases of the Delta variant to date. However, the Delta variant is circulating within our community, and all the vaccine research so far has shown some promise for protection against the variants.*
- *Unvaccinated individuals continue to be responsible for wearing masks, in accordance with federal CDC guidance. Consistent with the State's implementation of the recent CDC guidance, masks are still required for unvaccinated individuals. Further, the State's health guidelines continue to be in effect for large-scale indoor event venues, pre-K to grade 12 schools, public transit, homeless shelters, correctional facilities, nursing homes, and health care settings per CDC guidelines.*
- *ACDOH announced on August 13, 2021, that Allegany County moved from a moderate rate of COVID transmission to a substantial rate. Substantial rate of COVID transmission means there is 50 to 100 cases per 100,000, or a positivity rate between 8-10%. Substantial Transmission of COVID rates in Allegany County for Thursday, August 5, 2021, to Wednesday, August 11, 2021, were 26 positive cases of COVID or a rate of 56.41 positive cases per 100,000 population.*
- *Most of the positive cases in Allegany County have been the result of household transmissions, meaning, one or more people in the household are positive and pass COVID on to others in the household. Allegany County residents living in a household with a positive case should, if possible, practice social distancing, wear a mask, use a different bathroom, and clean and sanitize after the person in isolation.*
- *The CDC recommendations for individuals in communities with substantial transmission rates are to follow healthy hygiene practices, stay at home when sick, practice physical distancing to lower the risk of disease spread, and wear a mask (especially when physical distancing cannot be maintained).*
- *On August 18, 2021, the ACDOH announced the FDA authorized an additional dose of COVID-19 vaccine for certain immune compromised individuals. This amendment applies only to Moderna and Pfizer vaccine, not Johnson & Johnson. ACDOH will release additional information when the vaccination clinics are available for the third dose.*

***Governor Andrew Cuomo resigned effective Tuesday, August 24, 2021. Lt. Governor Kathy Hochul was sworn in as the state's first female governor.*

- *On September 9, 2021, President Joe Biden announced that all Head Start employees are required to become fully vaccinated against COVID-19. On September 21, 2021, the ACCORD Board of Directors approved an agency-wide vaccine mandate requiring all staff to be fully vaccinated by 11/23/2021.*

As a result of this unprecedented public health crisis, ACCORD Corporation is updating its Community Assessment because there is currently a significant impact on the community, and several short-, intermediate- and longer-term impacts are expected.

IMMEDIATE IMPACTS ON THE COMMUNITY

The immediate impact of COVID-19 has been felt across all sectors of society. In particular, some of the greatest impacts relevant to the Community Action Network have been in the areas of health, education, employment, human services provision, and community resources.

Nationwide, early data suggest that the following groups have experienced disproportionately higher rates of infection and/or complications/death as a result the COVID-19 pandemic:

- Males
- Individuals 60+ years old
- People of color, particularly African Americans
- People with underlying health conditions (especially, lung disease, asthma, diabetes, cardiovascular disease, kidney disease, liver disease, severe obesity, and individuals with immunocompromised conditions)

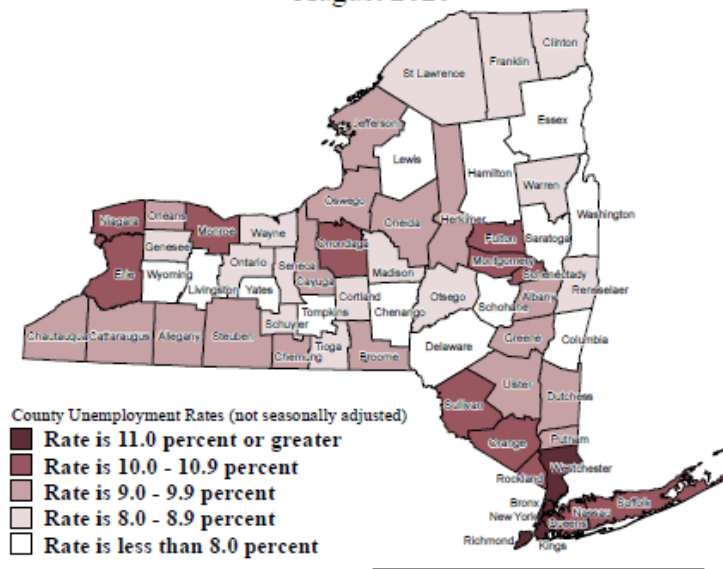

**Please reference Allegany County, NY: Coronavirus (COVID-19) Indicator Report August 2021 for specific information pertaining to the vulnerability indicators for Allegany County.*

The following outlines the variety of impacts to the local community thus far:

- **Health impacts:**
 - Individuals over 60, especially those with underlying health conditions, have been shown to be at particular risk for severe health implications from COVID-19. Of the estimated 47,025 total population in Allegany County, an estimated 8,444 individuals are adults ages 65 and older, representing 18% of the population. In addition, 15% of the population ages 65 or older are male putting them at an even higher risk of infection.
 - COVID-19 has changed how health care is delivered and affected the operations of healthcare facilities. Effects include increases in patients seeking care for respiratory illness that could be COVID-19, deferring and delaying non-COVID-19 care, disruptions in supply chains, fluctuations in facilities' occupancy, absenteeism among staff because of illness or caregiving responsibilities, and increases in mental health concerns. Community health resources are stretched thin as resources devoted to those sick with COVID-19 will limit resources available to others. However, as noted in our 2019-2021 Community Needs Assessment, health care systems across the Allegany County area were already stretched thin. Allegany County is home to just 2 hospitals and 19 primary care physicals to serve a total population of 47, 025. COVID-19 has changed how health care is delivered and affected the operations of local healthcare facilities.
 - Nutrition for school-aged children previously accessing free/reduced breakfast, lunch, and snacks is impacted as many are now removed from that food source due to school closures, steep declines in household incomes, changes in the availability and affordability of nutritious foods and interruptions to health, nutrition, and social protection services. The New York State Education Department issued Guidance in accordance with Executive Order 202.4, which assisted school districts as they established a COVID-19 plan for alternative instructional options, distribution and availability of meals, and childcare, with an emphasis on serving children of parents in the health care profession or first responders who are critical to the response effort. School districts were required to work with their communities or county feeding organizations (food banks, food pantries, Red Cross, etc.) to identify resources to address the needs of all children in their community and particularly, low-income children. School districts across Allegany County worked with community partners for distribution of food to students by instituting meal pick-up and delivery options. Meals were to be coordinated to be available to both children and adults at one location. Efforts were also made to minimize the distance families are forced to travel to access these options.
- **2021 Update-Health Impacts**

- *Individuals over 60, especially those with underlying health conditions, have been shown to be at particular risk for severe health implications from COVID-19. Of the estimated 46,688 total population in Allegany County, an estimated 8,596 individuals are adults ages 65 and older, representing 18% of the population. In addition, 15% of the population ages 65 or older are male putting them at an even higher risk of infection.*
- *On January 27, 2021, Allegany County announced COVID-19 Vaccination availability for phase 1B essential workers only, 100 doses were available Friday, January 29, 2021. Additionally, the Allegany County Office for the Aging announced vaccine edibility for individuals aged 65 or older however, at the time of the announcement only one Allegany County pharmacy had been allocated with vaccines specifically for those aged 65 and older.*
- *Becoming fully vaccinated has been shown to prevent severe illness, hospitalization, and death; it also helps reduce the spread of the virus in communities. Unvaccinated individuals are strongly encouraged to get vaccinated and continue masking until they are fully vaccinated. It is known that the highest spread of cases and severe symptoms is happening in places with low vaccination rates. According to the CDC, if you are vaccinated, your risk of infection is about 3.5 times lower, your risk of getting ill from COVID-19 is over 8 times lower, and your risk of hospitalization or death is 25 times lower.*
- *The delta variant shows an increased number of cases amongst children. The American Academy of Pediatrics has reported a significant increase in COVID-19 cases amongst people under 18 years of age. We know that the delta variant is much more transmissible than the other prior variants of COVID-19. This extends to children as much as to older teenagers and adults as well.*
- *Mental health needs, underserved in our County even before COVID-19, have increased because of the pandemic. Social isolation, stressors related to work, money, childcare, education, health and grief from loss have escalated the need for mental health services. The shortage of mental health care providers has worsened. One important adaptation during the crisis has been the increase of available and insured tele-med care which is particularly helpful in our rural community but does little to address challenges to tele-med access experienced by those with limited internet access and the elderly who often have limited experience or preference to access virtual health care.*
- **Employment impacts:**
 - *Individuals in the health care field are at high-risk of exposure to COVID-19 and are under tremendous stress due to additional work hours and challenging work conditions. In particular many of those workers with close, frequent contact with vulnerable individuals are lower-wage individuals.*
 - *Individuals in the educational field – especially teachers and assistants in Head Start and Early Head Start as well as other early childhood care settings worked remotely due to school shutdowns. Lower-wage workers in these fields are more vulnerable to layoffs and/or may lack the technology resources in their home to work remotely.*
 - *Individuals in many sectors of the economy – but particularly the service sector, the retail sectors, gig economy, and others most affected by quarantine policies – are currently experiencing sudden and unexpected unemployment. Some are unaware of resources available to them and their families as they are experiencing unemployment for the first time. Significant to many families in Allegany County and across the US was delays in receipt of unemployment insurance. The NYS Department of Labor was unprepared for the volume of new claims in the first months of the pandemics, causing long waits to apply followed by long delays in receipt of benefits. This impacted the need for emergency food which was met by weekly food provision events using a drive through model which assured healthy food got to families in need, many of whom were first time recipients of emergency food boxes. This model assured social distancing but did not allow for personal contact necessary to help assess additional family needs thus missing opportunities to provide resources or make referrals to other programs/resources.*

Unemployment Rates by County, New York State, August 2020

- **2021 Update- Employment impacts:**

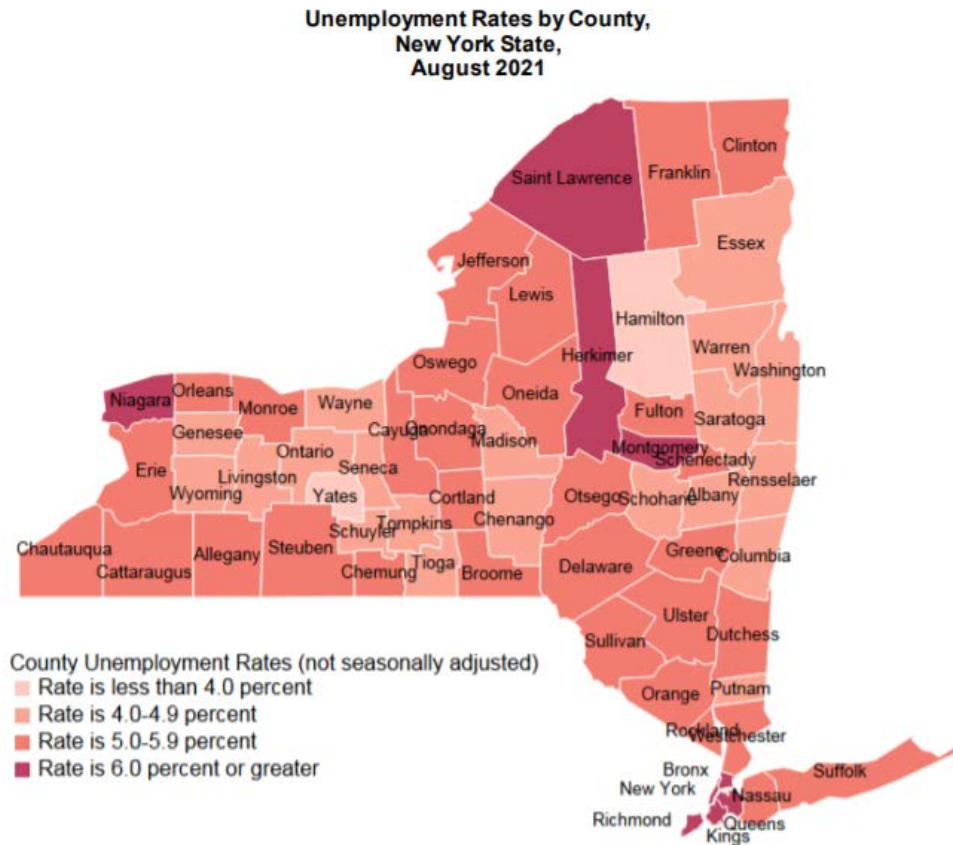

- *On September 5, 2021, several federal unemployment benefit programs expired across the country, per federal law, including Pandemic Unemployment Assistance (PUA) Pandemic Emergency Unemployment Compensation (PEUC), Extended Benefits (EB), \$300 Federal Pandemic Unemployment Compensation (FPUC), \$100 Mixed Earner Unemployment Compensation (MEUC). Effective August 9, 2021, EB will be available for a maximum of 13 weeks. Claimants who have received 13+ weeks of EB were no longer eligible for EB on their existing claim after the benefit week of August 9, 2021 but may be eligible for PEUC or PUA benefits through September 5, 2021.*

While enhanced unemployment benefits undoubtedly kept many families afloat, the \$300 supplemental benefit has been controversial. 26 states eliminated the enhanced payments early, with an eye to reducing the labor shortage, but the impact in those states has not been clear-cut. Of the 26 states that ended supplemental jobless benefits early, eight had a statistically significant drop in unemployment from June to July, according to federal data released in late August. Locally, NY State residents saw the end to enhanced benefits in early September with the impact on the labor market unknown yet.

- **Labor Shortage**

The US Bureau of Labor Statistics reported that 4 million Americans quit their jobs in July of 2021. Nationwide, 10.9 million jobs remained open. The greatest resignation rates were among those 30-45 years old. According to the Harvard Business Review, (“Who Is Driving the Great Resignation”, by Ian Cook) “The Great Resignation” was first coined by Professor Anthony Klotz at Texas A&M. In general, resignations rates were highest among those that experienced greater workloads and stress resulting from COVID-19, namely health care providers and technology workers. While the labor shortage began before COVID-19, the pandemic has accelerated the problem. Childcare availability, also a pre-pandemic issue, became a national crisis, workers began to reexamine priorities and reluctance to return to on-site work with continuing health and safety concerns due to the Delta variant, are all seen as contributing to the unprecedented number of people leaving their jobs. Also cited are workers no longer willing to work 2 part time jobs, low wages for many service jobs and lack of immigrants willing to work for less money. While wages continue to increase at unprecedented levels, the labor shortage is not going to resolve anytime soon. Families with low incomes, especially in rural areas, will continue to experience reduced access to health care and other critical services. Job opportunities have increased but barriers remain or

have increased. These include lack of skills and qualifications, lack of access to affordable, quality childcare, inconsistent school and daycare schedules due to COVID-19 outbreaks and lack of transportation. Additionally, the 2020 Census showed a continuing decline in Allegany County's population with a 5% population loss from 2010.

- **Educational impacts:**

- On March 16, 2020, Governor Andrew M. Cuomo signed an executive order directing all schools in New York to close by Wednesday, March 18 for two weeks ending April 1. Additionally, Governor Andrew Cuomo announced Friday, May 1, 2020, that the state's schools and colleges would remain closed for the remainder of the academic year and would continue distance learning to curb the spread of the COVID-19 outbreak. Closing of schools in Allegany County impacted 12 school districts, and approximately 5,953 students ranging from Prek-12.
- Closing of public schools in the Community Assessment area is having an immediate impact on children's education. Extended school closure is harmful to children. It can lead to severe learning loss, and the need for in-person instruction is particularly important for students with heightened behavioral needs. Children with less access to resources (broadband internet, computers/tablets, technology expertise, language barriers, etc.) are most at-risk for suffering learning loss during a period of school closure.
- Caregivers of school-age children must secure day care arrangements for their children or sacrifice employment to care for their children. These same caregivers are also expected to be primary teachers

for their children during the period of the closure. Parents with limited resources face numerous challenges because of this situation.

- **2021 Update- Educational impacts:**

- The COVID-19 pandemic placed a heightened responsibility on youth sports organizations, coaches, families, and athletes to reduce transmission and to foster a safer environment for children to participate in youth sports. On Friday, January 22, 2021, Governor Cuomo announced he would allow higher-risk sports to commence in New York schools effective February 1, 2021, subject to local health department approval. Individual schools, student athletes, and their parents/guardians must carefully consider a variety of factors before making an individual decision to participate.
- August 13, 2021-Allegany County School Districts will be recommended to follow the Centers for Disease Control and Prevention (CDC) and New York State Education Department (NYSED) guidelines this fall.
- Allegany County School Districts will be recommended to follow the Centers for Disease Control and Prevention (CDC) and New York State Education Department (NYSED) guidelines this fall.
- Governor Kathy Hochul on her first day in office announced a new, comprehensive plan to help ensure a safe, productive return to schools this fall in the midst of rising COVID-19 numbers fueled by the Delta variant. As part of this plan, Governor Hochul has directed the New York State Department of Health to institute a universal mask requirement in all schools, public and private, as determined necessary at the discretion of the Commissioner. Governor Hochul will also pursue options to mandate vaccines for school employees or require weekly testing in the absence of vaccines and will continue to work with the Department of Health, education stakeholders and the Legislature on establishing the mandate.
- On August 27, 2021, the New York State Department of Health filed an emergency regulation mandating masks inside all school buildings. All students, faculty and staff of public and private schools, pre-K through 12th grade, will be required to wear masks inside school buildings. Visitors will also be required to wear masks inside school buildings. The state is also working toward implementing a program requiring the COVID vaccine or weekly testing for all school personnel across New York.

- **Childcare impacts:**

- Please see separate Childcare Community Needs Assessment.

- **2021 UPDATE- Childcare:**

- A report from the Center for the Study of Child Care Employment states that the childcare system was reduced 20% and 200,000 childcare professionals lost their jobs within the first six months of the pandemic. Our region is no different with 74 childcare programs closing with an estimate of 1700 fewer childcare slots. Even now as childcare programs struggle financially to keep their services available, the additional operational cost to ensure staff and children remain safe mixed with reduced enrollment has made it extremely difficult to sustain business resulting in program closings and additional job losses. Unfortunately, it is anticipated that this will continue with some programs not recovering.
- New York State's investment in early care and education in the FY 2021-2022 Budget brings a positive light of hope. This budget takes big steps in addressing childcare subsidies by increasing eligibility to 200% of the Federal Poverty Level statewide, will cap childcare co-payments to 10% of a family's income over the federal poverty level, and will reimburse childcare programs for 24 absences per child - per year. Also expanding the current 6-month to 12 months eligibility approval for families receiving subsidies. The budget will add an additional 10,000 childcare slots. Child Care programs that were forced to close and/or still struggling financially will have access to \$1.26 billion in up-front stabilization grants to increase wages and benefits. The budget provides \$100 million to build new childcare programs in areas such as ours that is deemed to be childcare deserts and Universal Pre-Kindergarten will expand throughout New York State. The budget also expands the Childcare Scholarships for essential workers and grants for supplies and PPE to childcare providers.

**For an in-depth look at childcare, please see Head Start and Child Care Services Report which can be found at the end of this report.*

- **Impacts on human services provision:**
 - Services to vulnerable populations are being curtailed or drastically changed. Some service providers were forced to close or limit services to emergency services only, including dentists, adult literacy and job programs, in person mental health services, non-urgent medical checkups, are not operating leaving gaps in services to the community. Other service providers have had to alter their service provision in significant ways, leaving some family needs unmet. Finally, for those service providers continuing to operate, the changed circumstances have required significant, immediate adaptations that will require additional resources to support over a longer period of time. Throughout 2019 and the early part of 2020, ACCORD invested heavily in technology upgrades which allowed remote delivery of many services to continue during the period known as NY PAUSE which prohibited in person delivery of in person services delivery. Essential services such as the emergency food pantry and domestic violence victim services continued by appointment with limited face to face interaction made possible through use of telephone, on-line enrollment and eligibility verification. ACCORD's leadership team met remotely twice daily for the first several weeks of the pandemic to assure identification of need and allocation of resources as possible to meet community needs. Examples include video meetings with Head Start parents and children, delivery of healthy food to enrolled families via Head Start buses, telephone and remote meetings to support small businesses seeking to access operation support opportunities made available through the CARES legislation.
- **2021 UPDATE-impacts on human services provision:**
 - As noted in the Employment section, labor shortages impact both quality and quantity of human services provision, which is most impactful to vulnerable populations. Access to safe and affordable housing, a nationwide crisis before the pandemic, continues with no long-term solutions in sight. A wide scope of rent and utility support programs were put into place in 2020 to support landlords and tenants. These programs have been widely criticized for how slow they are at getting resources to where they are most needed. Much of the delay is due to the restrictions on spending based on industry definitions of homelessness. Using that as a requirement for assistance, the moratorium on eviction has created a pending crisis as rent goes unpaid; assistance depends on imminent eviction and landlords are prohibited from evicting for non-payment. Ongoing adjustments to eligibility are easing this bottleneck to some degree and while the CDC's eviction moratorium was vacated federal judge in May 2021, the anticipated eviction crisis has not occurred as predicted. Some states have extended the moratorium through state law, including New York. Housing support delivery has also been slowed by the labor shortage impacting housing service providers across the country. Other human service agencies continue to struggle with labor shortages, rapidly changing safety and health rules and recommendations and reluctance by some in need to access services due to safety concerns related to community spread.
- **Broadband access impacts:**
 - As COVID-19 causes schools and employers to transition to remote learning and work setups, Allegany County and surrounding rural families face hurdles due to the digital divide. In the most remote, rural areas of the country, large numbers of residents suffer under slow DSL service—or no internet service at all. We can probably work and learn for months this way, but many Americans do not have this option because the remote, rural areas in which they live have little to no broadband infrastructure at all. During the pandemic, many have addressed this gap by handing out personal hotspot devices (like routers) or smartphones or utilized mobile hotspots to that lacking internet. Personal hotspots, which allow students or employees to connect a laptop or tablet with a cellular data connection, have been the most popular solution because they are relatively inexpensive and easy to use, but in many places, it is not enough and rarely is powerful enough for downloads or video calls.

- This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represents both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included.

Report Area	Total Population (2010)	Access to DL Speeds > 25MBPS (2019)
Allegany County, NY	48,946	78.98%
New York	19,378,102	98.98%
United States	312,471,327	95.31%

Note: This indicator is compared to the state average.

Data Source: National Broadband Map. June 2019. Source geography: TractShow more details

Percentage of Population with Access to Broadband Internet (DL Speeds > 25MBPS)

Broadband Access, Pct. Population in a High-Speed Internet Service Area by Tract, FCC June 2019

- 2021 UPDATE-Broadband impacts:**

- May 12, 2021, the Emergency Broadband Benefit Program launched, providing a temporary discount on monthly broadband bills for qualifying low-income households. The program will end when the fund runs out of money, or six months after the Department of Health and Human Services declares an end to the COVID-19 health emergency, whichever is sooner. Households that are eligible can receive:
 - Up to a \$50/month discount on your broadband service and associated equipment rentals
 - Up to a \$75/month discount if your household is on qualifying Tribal lands
 - A one-time discount of up to \$100 for a laptop, tablet, or desktop computer (with a co-payment of more than \$10 but less than \$50). To check if you qualify visit: <https://getemergencybroadband.org/>

- Community resource impacts:**

- Electronic device needs for students appear to be met via school and community resources. Access to broadband clearly remains an issue and families in very rural areas, relying on access through community locations such as libraries, school wi-fi, restaurants and other family members, could no longer rely on this option. Of interest, information gathered through school districts concerning access did not reveal the problem to be as severe as predicted by educators and service providers, according to parents. We do not have access to these survey results other than this informal analysis. Noting that some parents seemed defensive or unwilling to report lack of access. This may, in part, be attributed to concerns of being questioned or even charged with educational neglect.
- The impacts of COVID-19 on community resources are numerous and include a reduction in the availability of resources (access to group activities, commercial services), a scarcity of some resources (health care, food and emergency supplies) and/or needs for resources that have not previously been required in this community in any significant capacity.
 - Food Services

 - Drive-Through Distributions
 - Households: 5,191
 - Children: 5,843
 - Adults: 8,955
 - Elderly: 2,499
 - Total People: 17,297
- **2021 UPDATE-Community resource impacts:**
 - Overall, throughout the course of the pandemic, locally, through increased community and public support, we have had a significant impact on hunger through changes to emergency food provision via drive up food distributions which continue to occur regularly throughout the county. This has addressed the need for enhanced health and safety protocols by limiting physical contact and reducing barriers connected to eligibility and enrollment. This also provided a degree of privacy important especially to families experiencing hunger for the first time due to abrupt changes in employment and other social supports including free school breakfast and lunch programs. Throughout most of 2020 and into 2021, this model assured additional produce, dairy and meat supplies through both public and private resources coming from federal, state and local agencies and individuals. Telephone food box requests with a front porch pick up option also allowed for safer distribution of emergency food boxes

 - Total People: 6283
 - **Mental Health Services**
 - Mental health resources will need to be available in new and increased ways to deal with the many different stressors/traumas caused by the pandemic, especially its impact over an extended time.
 - Social distancing, quarantine, and isolation can be overwhelming and cause strong emotions in both adults and children. Fear and anxiety about a new disease and what could happen can be overwhelming and cause strong emotions in adults and children. Public health actions, such as social distancing, can make people feel isolated and lonely and can increase stress and anxiety. Additional mental health impacts can appear for those who experience income losses new or increased financial hardships.
 - As noted in our 2019-2021 Community Needs Assessment, Allegany County is a mental health shortage area. Our assessment also noted a significant increase in a spike in mental health issues related to the daily challenges to living at or near poverty and an increase in mental health issues among the younger generations. According to the Centers for Disease Control and Prevention, the 2011-2017, average annual deaths is 14.

- The broad impacts of COVID-19 on this community have created an even more urgent need for coordination and collaboration of resources among the public sector, the public health sector, first responders, educators, the business community, the faith community and many others. ACCORD Corporation plays an important role convening organizations, people and resources to support families.
 - ACCORD has long facilitated Allegany County's Homeless Housing Task Force and the Allegany County Food Coalition. Each of these groups will continue to analyze needs and resources as the impacts of COVID-19 emerge and change. ACCORD has actively participated in the Consolidated Services Meeting convened by Ardent Solutions which met weekly following the onset of the pandemic moving to a bi-weekly schedule when community conditions stabilized. This platform has allowed for a broad, inclusive sharing of resources and information between government officials, health care providers, educators, services agencies from across the spectrum. Examples of collaboration include shared responsibility between Cuba Cultural Center and ACCORD for delivery of weekly, large scale food distribution, between ACCORD and the Allegany County Department of Health to assure delivery of food boxes to families under quarantine and between ACCORD and local school districts to assure families in need receive food, school and health and safety supplies. Partnership between ACCORD's Head Start program, the Allegany County Office for the Aging, Good Times of Olean and Sound Communications resulted in a fund raiser named Twin Tiers Meals that provided 166 prepared meals to Allegany County residents in need.
- **2021 Update**-Collaboration between service agencies remains critical to addressing the changing needs of our community as we approach the second half of the second year of the COVID-19 pandemic. Direct support to families and individuals through federal legislation has had a significant impact on daily life and alleviated many of the conditions of poverty that were anticipated as the pandemic spread. What lies ahead is not known but our community has managed to respond to urgent needs by purposefully and consistently working together to make the most of what we have, assure we are position to receive resources that are available and be prepared for the changes yet to come, to the degree possible. Labor shortages, vaccine hesitancy, lasting impacts of isolation, a missed school year and the loss of so many of those we love are just some of the challenges ahead.

ANTICIPATED NEAR- AND LONG-TERM IMPACTS

The needs above are already established through initial data and anecdotal reports from customers, staff, board members and community stakeholders. Based on these already-observed events, it is likely that there will be near-term (1-3 months) and longer-term (greater than 3 months) impacts that that require immediate planning. A partial, but not complete, list of the anticipated impacts includes:

- *Prolonged service disruptions*
The disruptions in service delivery to customers are expected to continue for a substantial time. This is likely to lead to ancillary challenges for customers that may become long-term issues.
 - School re-opening schedules have been determined locally with significant collaboration between districts, the Cattaraugus Allegany BOCES, the Allegany County Department of Health and the health care provider community. Early Head Start and Head Start reopening began with reduced program hours to assure social distancing and enhanced sanitation procedures.
- *Prolonged employment issues*
Sudden layoffs and other employment disruptions are being addressed by emergency response measures; however, it is anticipated that long-term recovery efforts will be required to help customers reconnect to the workforce, particularly those for whom employment assistance has not previously been required.
- *Prolonged agency capacity issues*
Policies limiting in-person staff/customer interactions may be in place for an extended period and agencies will need to maintain remote work and remote customer-interaction infrastructure to be responsive to these needs in a more sustainable capacity.

- *Prolonged community resource/coordination issues*

The short-term community coordination needs cited in this Assessment are presumed to continue into the long-term. Current conditions may persist for an extended period; recovery efforts will require coordination; ongoing community preparedness to guard against a future outbreak will also require ongoing convening and new community readiness strategies based on what is shown to be effective during the current crisis.

ADDRESSING EQUITY IMPLICATIONS

Though immediate data may not yet be easily obtained regarding the demographics of those most impacted by the COVID-19 epidemic, previous Community Assessments, as well as countless government and academic studies have established that structural racism, xenophobia, sexism, stigmatization and othering persist – and are often exacerbated – in times of crisis. Community Action recognizes the obligation to ensure that the barriers of structural race, gender, and other inequities are addressed during this time of crisis and beyond. Therefore, it is with this lens that communities are invited to use the equity lens and the question, “why,” to understand the specific needs of the diverse populations served.

CONCLUSION

Given the current circumstances and uncertainties surrounding the direction of the COVID pandemic, ACCORD Corporation has identified the following key areas on which to focus:

- **Childcare-** ACCORD anticipates long term childcare impacts with an increased need for Child Care for school aged children due to the hybrid model some school districts are reopening with, as well as the possibility of another shutdown.
 - ***2021 UPDATE** – The availability of affordable, quality childcare remains a serious crisis across the country. Allegany, Cattaraugus and Wyoming Counties are identified as childcare deserts with the crisis continuing to worsen, despite significant federal support for childcare providers. For more detailed information on the impacts of childcare, please see the attached “Child Care Services 2021 Annual Report.”*
- **Food-** During the COVID-19 pandemic food insecurity has been a growing concern.
 - ***2021 UPDATE** – The dramatic expansion of emergency food provision made possible by public resources and private donations continue to support many families in need in 2021. While some restrictions have eased, COVID-19 is still impacting many aspects of everyday life, including employment, health care and childcare. In 2020, over 37% of Allegany County’s population accessed some source of food assistance.*
- **Rent/Mortgage/Utility Assistance-** Delays in unemployment benefits resulted in many low-income households being unable to pay rent and/or utilities. Additionally, long term shutdowns of local businesses also resulted in a lack of revenue and income for many households. Re-opening guidelines calling for decreasing capacity to maintain social distancing guidelines equals a reduction in revenue as businesses do reopen. Both factors strongly suggest that some smaller businesses will not re-open, and others will be forced to reduce staffing. With the moratorium on evictions set to expire, we anticipate a large need for back rent/utility assistance to prevent homelessness.
 - ***2021 UPDATE** – Federal funding for programs such as the ERAP program through the NYS Office of Temporary Disability Assistance is impactful toward alleviating the potential housing crisis anticipated when NYS lifts the eviction moratorium in January 2022. Other CARES funding and pre-COVID-19 supports exist to reduce homelessness, but systemic issues remain unresolved. Lack of affordable, safe housing will continue to demand long-term solutions.*

- **Access to Technology-** More and more services continue to transition to remote and virtual. Remaining connected virtually can be challenging for low-income families that are lacking equipment and access to high-speed internet service.
 - ***2021 UPDATE** – Assistance with broadband costs for families with low-incomes has expanded access to many. Additional support such as making laptops and other devices available, and some expanded internet service has also been impactful. Those living in very isolated rural areas continue to experience lack of access. While in-person school has been the standard in Allegany County for much of 2021, school/classroom closures continue due to COVID-19 outbreaks.*
- **Agency Capacity Building-** the pandemic requires all service providers to reassess service delivery methods and revamp spaces that allow for social distancing, as well as services that are effective and flexible. Specific needs within ACCORD include staff training and onboarding, revisions to our common areas to allow for social distancing and continuing to increase and improving our use of technology and remote work situations. We will continue to introduce and improve new building cleaning practices, sanitation stations, etc. to operate and carry out services in a clean safe environment for staff and clients.
 - ***2021 UPDATE** – Safety and Health precautions have dominated daily planning. Health checks, mask mandates, social distancing, and limits on occupancy and in-person services and agency events continued through most of 2021. The availability of the vaccine initially promised and briefly delivered an easing of masking mandates and some social distancing and required health checks. The arrival of the Delta variant and level of vaccine hesitancy resulted in a return to strict health and safety protocols. Most services continued virtually or in a hybrid (some in-person and some virtual) models. Classrooms have briefly closed due to exposures, quarantines and staffing shortages resulting.*
- **Trauma Informed Care-** The COVID-19 pandemic is a traumatic event, impacting all people and communities. The stress of the pandemic is exacerbated by the lack of job security and loss of income for millions of Americans. The current crisis may also compound the previous traumas of individuals, which may result in re-traumatization. ACCORD anticipates that the community will need to embrace a trauma informed approach when responding to conditions caused by the pandemic.
 - ***2021 UPDATE** – The agency continues to actively deliver training on trauma-informed care and remains an active member of local and state coalitions working to increase capacity for all human service agencies, educators, and health care providers to recognize and respond to trauma.*

Vulnerable Populations

Population Age 65+

Of the estimated 46,688 total population in the report area, an estimated 8,596 persons are adults aged 65 and older, representing 18.41% of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates. The number of older adults in the report area is relevant because this population has unique needs which should be considered separately from other age groups.

Report Area	Total Population	Population Age 65+	Population Age 65+, Percent
Allegany County, NY	46,688	8,596	18.41%
New York	19,572,319	3,146,306	16.08%
United States	324,697,795	50,783,796	15.64%

Population by Combined Race and Ethnicity

This indicator reports the percentage of the total population in the report area by combined race and ethnicity.

Report Area	Non-Hispanic White	Non-Hispanic Black	Non-Hispanic Asian	Non-Hispanic Native American or Alaska Native	Non-Hispanic Native Hawaiian or Pacific Islander	Non-Hispanic Some Other Race	Non-Hispanic Multiple Races	Hispanic or Latino
Allegany County, NY	94.40%	1.42%	1.17%	0.23%	0.03%	0.05%	1.06%	1.63%
New York	55.61%	14.26%	8.35%	0.24%	0.03%	0.54%	1.97%	19.01%
United States	60.70%	12.31%	5.45%	0.67%	0.17%	0.24%	2.45%	18.01%

Uninsured Population

The lack of health insurance is considered a *key driver* of health status.

In the report area 6.64% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 5.78%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Uninsured Population	Uninsured Population, Percent
Allegany County, NY	46,221	3,069	6.64%
New York	19,333,899	1,117,159	5.78%

COVID-19 Data & Indicators

COVID-19 Cases

This indicator reports incidence rate of confirmed COVID-19 cases per 100,000 population. Data for this indicator are updated daily and derived from the Johns Hopkins University data feed.

In the report area, there have been 3,707 total confirmed cases of COVID-19. The rate of confirmed cases is 7,984.06 per 100,000 population, which is less than the state average of 11,639.26. Data are current as of 08/31/2021.

Report Area	Total Population	Total Confirmed Cases	Confirmed Cases, Rate per 100,000 Population	Last Update
Allegany County, NY	46,430	3,707	7,984.06	08/31/2021

COVID-19 Fully Vaccinated Adults

This indicator reports the percent of adults fully vaccinated for COVID-19. Data is updated daily from the CDC API. Vaccine hesitancy is the percent of the population estimated to be hesitant towards receiving a COVID-19 vaccine. The Vaccine Coverage Index is a score of how challenging vaccine rollout may be in some communities compared to others, with values ranging from 0 (least challenging) to 1 (most challenging).

Report Area	Percent of Adults Fully Vaccinated	Estimated Percent of Adults Hesitant About Receiving COVID-19 Vaccination	Vaccine Coverage Index	Last Update

Economic Vulnerability

Area Deprivation Index

This indicator reports the average (population weighted) Area Deprivation Index (ADI) for the selected area. The ADI is a metric used to rank neighborhoods by socioeconomic status disadvantage in a region of interest (e.g. at the state or national level). ADI scores range from 1 to 100, with 1 representing the least disadvantaged areas.

Mobility Reports

The table below displays data from the Google mobility reports. These reports show how visits and length of stay at different places change compared to a baseline. The baseline is the *median* value, for the corresponding day of the week, during the 5-week period Jan 3–Feb 6, 2020. Google prepared this report to help you and public health officials understand responses to social-distancing guidance related to COVID-19.

Within the report area, the number and length of visits to workplaces decreased by -37%, while trips to the grocery store or pharmacy increased by 24%. This compares to the statewide totals of -38% trips to workplaces and 2% trips to grocery stores and pharmacies.

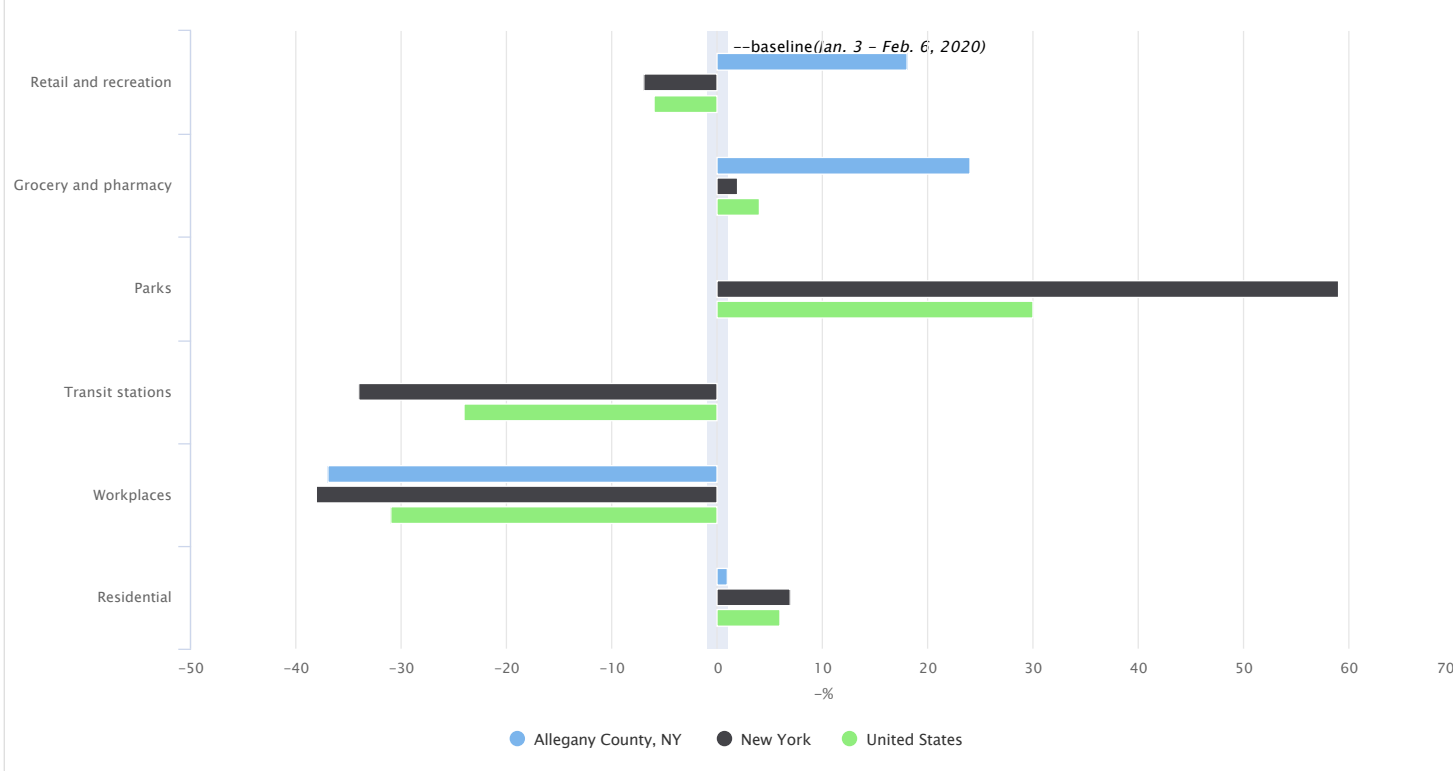

Report Area	Report Date	Retail and recreation	Grocery and pharmacy	Parks	Transit stations	Workplaces	Residential

HSPS 1302.11 COMMUNITY ASSESSMENT

(b) *Community wide strategic planning and needs assessment (community assessment)*. (1) To design a program that meets community needs, and builds on strengths and resources, a program must conduct a community assessment at least once over the five-year grant period. The community assessment must use data that describes community strengths, needs, and resources and include, at a minimum:

(I) THE NUMBER OF ELIGIBLE INFANTS, TODDLERS, PRESCHOOL AGE CHILDREN, AND EXPECTANT MOTHERS, INCLUDING THEIR GEOGRAPHIC LOCATION, RACE, ETHNICITY, AND LANGUAGES THEY SPEAK, INCLUDING

(no significant change based on eligibility and population data trends)

(A) CHILDREN EXPERIENCING HOMELESSNESS IN COLLABORATION WITH, TO THE EXTENT POSSIBLE, MCKINNEY-VENTO LOCAL EDUCATION AGENCY LIAISONS (42 U.S.C. 11432 (6)(A));

(no significant change based on eligibility and population data trends)

(B) CHILDREN IN FOSTER CARE; AND

Per the Foster Care Supervisor at Allegany County Department of Social Services, 11 children entered foster care in the calendar year 2020. From January – May 2021, 10 children already were placed. Foster care rates have almost doubled during COVID.

(C) CHILDREN WITH DISABILITIES, INCLUDING TYPES OF DISABILITIES AND RELEVANT SERVICES AND RESOURCES PROVIDED TO THESE CHILDREN BY COMMUNITY AGENCIES;

130 children under age three received Early Intervention services, and 181 children ages 3 – 5 received services through the school district's Committees on Preschool Special Education during the calendar year 2020. COVID-19 significantly reduced the number of children served.

(II) THE EDUCATION, HEALTH, NUTRITION AND SOCIAL SERVICE NEEDS OF ELIGIBLE CHILDREN AND THEIR FAMILIES, INCLUDING PREVALENT SOCIAL OR ECONOMIC FACTORS THAT IMPACT THEIR WELL-BEING;

According to parent survey results completed in March 2021, the top five needs identified by parents include: Child Care, Recreation/Socialization Opportunities, Transportation/Vehicle, Holiday Assistance, and Shelter/Housing. One notable difference from previous years is that Good Paying Jobs/Employment is not in the top five needs. We believe this is due to the COVID stimulus checks and pandemic unemployment benefits offered in addition to regular unemployment wages during the COVID-19 pandemic. The moratorium on evictions was also extended due to the pandemic, and we continue to anticipate that many families will lose their housing once the moratorium is lifted.

Survey attached.

(III) TYPICAL WORK, SCHOOL, AND TRAINING SCHEDULES OF PARENTS WITH ELIGIBLE CHILDREN;

81 of 90 respondents, or 90%, indicated that their typical work, school, or training schedules are Monday through Friday from 8:00am – 4:00pm. 9 of 90 respondents, or 10% indicated their schedules are evenings and weekends.

101 out of 106 respondents, or 95%, indicated that our current program hours meet their needs.

Survey attached.

(IV) OTHER CHILD DEVELOPMENT, CHILD CARE CENTERS, AND FAMILY CHILD CARE PROGRAMS THAT SERVE ELIGIBLE CHILDREN, INCLUDING HOME VISITING, PUBLICLY FUNDED STATE AND LOCAL PRESCHOOLS, AND THE APPROXIMATE NUMBER OF ELIGIBLE CHILDREN SERVED;

The last expansion of UPK services was implemented in January 2020 with Bolivar-Richburg opening a half day UPK program for 3-year-olds. Projections for the availability of UPK for 4-year-olds has remained consistent with the 2019/2020 school year. The impact of COVID-19 on UPK projected enrollment for Fall 2020 is significant. Most districts were unable to implement a spring UPK screening process resulting in approximately 50% of the expected enrollment actually registering for UPK. Most districts are operating at least a partially in person UPK program for Fall 2020. UPK funding/contracts were delayed by NYS Dept. of Education which also caused some delays in programming announcements for 2020/2021 COVID-19 operations.

There were no significant changes in UPK enrollment during 2020; however, New York State is expanding funding for UPK for 3- and 4-year-old children for the 2021/2022 school year. We anticipate large increases in the availability of UPK for 3- and 4-year-old children in Allegany County.

Reports attached.

Specific child care enrollment numbers are available in the Child Care Services section of the Community Assessment.

(V) RESOURCES THAT ARE AVAILABLE IN THE COMMUNITY TO ADDRESS THE NEEDS OF ELIGIBLE CHILDREN AND THEIR FAMILIES; AND,

While there have not been significant changes in community resources, there has been a marked increase in the availability of food resources from an increase in mobile pantries.

(VI) STRENGTHS OF THE COMMUNITY.

Most parent survey respondents indicated that our communities' biggest strengths are its residents. Even during a pandemic that required physical distancing, there still is a sense of closeness, helpfulness, and support among friends, families, and neighbors. Living in rural communities poses many challenges, however, residents do feel a strong sense of safety, of connection to each other, and connection to their communities.

CHILD CARE SERVICES COMMUNITY ASSESSMENT UPDATE- 2021

Allegany, Cattaraugus, and Wyoming Counties are included in WNY childcare desert. Availability of quality, affordable childcare was an issue prior to the COVID pandemic, and the pandemic has impacted the childcare system greatly. Child Care in our service areas continues to decline with 96 childcare programs currently in operation. This does not mean; however, they are operating serving children. Low enrollment continues to impact childcare programs across. Low enrollment has impacted programs financially with has caused some programs to close. NYS. There are 96 Licensed/Registered childcare programs in our tri-county area and according to the most recent census there are over three times more children than there are licensed/Registered childcare enrollment slots. Another cause for low enrollment was families were concerned about health safety and the continuous changes/updated from the Gov office left families unsure if childcare programs were able to remain in operation or be forced to close.

According to research gathered by the WNY Women's Foundation, nearly 31% of women aged 25-44 with children at home were not working because of COVID-19 related childcare issues, compared to 11.6% of men.

As a result of Gov. Andrew Cuomo's "New York State on PAUSE" executive order in mid-March, schools and non-essential businesses were required to shut down, forcing working parents to take on the role of full-time educators and childcare providers, in addition to their day jobs, while essential workers scrambled to locate childcare for their school-aged children.

Programs that remained in operations immediately put measures into place social distancing procedures and upped their sanitation procedures and health check procedures to try to offset the transmission of COVID for the safety of their children, families, and staff. Programs reduced pressure on families by offering additional support for children to continue with remote learning and homework activities during school closures. However, this is something family-based programs have been doing right along prior to the pandemic.

Greatly impacted are Home based childcare providers that do not have the financial support systems in place as they are not grant funded. Low enrollment and fear of transmission of COVID into their family homes. In March of 2020, a significant percentage of childcare programs had families that removed their child(ren) from care based off fear, loss of employment, or remote employment. Home based childcare programs were often ineligible for Federal and State funding that was available to other small businesses.
